

LYNCEA PATROL[®] IS AN OPEN AND MODULAR MISSION MANAGEMENT SYSTEM GIVING TO OPV AND COVERTS CAPACITIES TO MONITOR AND ESTABLISH A COMMON MARITIME PICTURE BETWEEN SEVERAL UNITS COMPILING LOCAL SENSORS AND DATA LINKS.

Thanks to its weapon management and decision making tools, LYNCEA PATROL is **multi-mission** and especially efficient in above water warfare such as sovereignty, EEZ protection, Maritime or fisheries control, illegal trafficking, anti-piracy, search & rescue...

By providing an overall view of the area of interest, LYNCEA PATROL enhances the situation awareness, command & control and maximizes efficiency of sensors and weapons.

Based on a federated architecture, LYNCEA PATROL offers an **affordable, flexible and upgradeable solution** that can meet challenges of today but also tomorrow. Designed for RHIB, speed boats and OPV, LYNCEA hardware is **rugged and scalable** to your needs from tablets to Multi-Touch tactical multi-function consoles or tactical tables.

FEATURES:

EASY SETUP: LYNCEA modular architecture can be adapted to any subsystem for easy on board integration (**new building or retrofit**)

INTUITIVE: The click & see intuitive user interface allows the operator to be multitasking and fully operative after a short-time training

RUGGED: COMBAT proven, MIL-STD-810G et IP65

APPLICATIONS:

Survey of maritime zones, counter-piracy and counter-smuggling, SAR, SpeOps, constabulary missions, environmental protection, fisheries control.

REFERENCES:

From 2009, LYNCEA is in service and combat proven on board French Navy ships and an OPV of a foreign Navy.

SERVICES:

Expert in integration of complex systems, NEXEYA provides support to customers as Design Authority and System Integrator for small to medium-sized naval systems.

OPTIONS:

In order to improve effectiveness at all levels, NEXEYA proposes a wide range of options:

LYNCEA COMMAND offers to maritime commanding centres the capacity to analyse, decide and coordinate missions between naval forces using tactical data link available (L11, L16, LINK Y...)

LINK P is an secure HF or SATCOM tactical data link that offers to countries the capacity to increase effectiveness by sharing tactical situation and access to C2 all over your EEZ.

LYNCEA MOBILE version makes the tactical situation available for an intervention team on a RHIB and has a chat and multimedia contents transfer capability.

LYNCEA TRAINING offers a complete and realistic tactical environment for the LYNCEA operators thanks to **TACSIM** advanced tactical simulator and **SIMCOM** complete audio environment emulator. NEXEYA proposes scalable solutions going from light on-board easy deployable to exact replica simulator.

VERSIONS

LYNCEA COMBAT

For medium to large OPV.
Multi console, all missions capable

LYNCEA PATROL

For small to medium OPV.
Multi/Mono console, above water missions dedicated

LYNCEA MOBILE

For speed boats and RHIB.
Multi-touch tablet, SpecOps and police missions

LYNCEA COMMAND

For Command Centres.
PC or consoles, maritime operations management

LYNCEA TRAINING

For Training Centres.
PC or consoles, include scenario management tools to easy built training missions

MT3

Military or civilian versions
Multi Touch Tactical Table to display the tactical situation evolution on cartographic background
